## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 7 and 14 are allowed.

The following is a statement of reason for the indication of allowance:

Applicant's independent claims 7 and 14: The present invention is directed to an access point operable to provide wireless network access to client devices coupled to a wireless network, and a controller capable of automatically choosing one of a plurality of radio frequencies on which to operate, said controller choosing said frequency after evaluating frequencies on which other access points operate, the independent claim identifies the patentably distinct feature "a) logic for picking a frequency; b) logic for transmitting on said frequency; c) logic for receiving on said frequency; d) logic for evaluating whether other access points are heard on said frequency; e) logic for reducing transmission power; f) logic for evaluating whether said other access points are still heard on said frequency; g) logic for storing the transmission power at which no other access points are heard; h) logic for picking a next frequency as the frequency and repeating steps b-g until all of the plurality of frequencies has been picked; i) logic for comparing said stored transmission powers; j) logic for choosing for operation the frequency associated with the highest stored transmission power". Applicant's independent claims 7 and 14 comprise a particular combination of elements, which is neither taught nor-suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2617

accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
